

Language interpretation ЛЕКСИЯ И 2

Language interpretation, or interpreting, is the facilitating (облегчающий) of oral or sign-language (язык жестов, язык глухонемых) communication, either simultaneously (вместе, одновременно) or consecutively (непрерывно, постоянно), between users of different languages. [Translation studies](#) is the systematic study of the theory, description and application of language interpretation and [translation](#).

An *interpreter* is a person who converts (переводить) a thought or expression in a source language into an expression with a comparable (сравнимый) meaning in a target language (язык перевода) either simultaneously in "real time" or consecutively after one party has finished speaking. The interpreter's function is to convey every semantic element (tone and register) and every intention and feeling of the message that the source-language (исходный язык) speaker is directing to target-language recipients. получатель
